Upskill your team to identify weaknesses and prevent attacks.

Prevention is more cost-effective than remediation. Regular training is an investment that pays off by reducing the risk of incidents and the associated expenses of recovering from a breach.

Cultivate a Cyber Aware culture within your business, by team empowerment, through programs with defined learning outcomes, designed by expert Instructional designers. Build business resilience and grow your team's confidence in an increasingly challenging threat environment.

Cyber Essentials training will:

- ✓ **Mitigate human error:** 95% of breaches are the result of human error. Targeted, right-fit training for different stakeholder groups empowers your team and sends the cyber criminals elsewhere.
- ✓ **Fortify your frontline:** equip your team with the knowledge and skills to recognise and thwart cyber threats. Turn your team into vigilant guardians against threats of phishing, ransomware and other malicious activities.
- ✓ **Improve your risk profile:** Minimise the risk of legal repercussions, business disruption and penalties, reduce your cyber insurance premiums and ensure your reporting and compliance obligations are met, year-round.
- ✓ **Protect from emerging threats:** New attacks are constantly emerging. Cyber Essentials content is constantly updated to reflect new tactics and vulnerabilities. Stay ahead of emerging threats with regular micro-learning scaled to your industry.

RIGHT FIT, FLEXIBLE, LOCALISED CYBER SECURITY TRAINING

Cyber Essentials offers a scalable solution to fit your specific business requirements.

- ✓ Need one-off fast upskilling for your whole workforce? Looking for ongoing training to maintain ISO27001 certification and minimise your insurance premiums? Cyber Essentials for Employees is ready to go today!
- ✓ Looking for Bespoke training customised to challenges faced by your industry? Integrate custom branding; relevant statistics, regulations and specific concerns for your business; your policies and procedures; and an action checklist for breach notifications into the essentials platform.

Cyber Essentials Training Topics include:

- 🛡️ Identifying cyber threats
- 🛡️ 'Zero Trust' mindset
- 🛡️ Cyber security incidents
- 🛡️ Data flows, security and protection
- 🛡️ Phishing emails and malicious links
- 🛡️ Malware and ransomware identification
- 🛡️ Cyber hygiene in the workplace
- 🛡️ Roles and responsibilities
- 🛡️ Policies and procedures

Would your employees take the bait?

Optional additional testing simulations are available as part of your Cyber Essentials training package. Design a custom testing program to ensure your training is changing behaviours and improving your business's Cyber Culture.
